DETAILED ACTION

Applicants' arguments, filed 6/1/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claims 57-120, 122-125, 129-132, 134-136, 141-144, 149-152, 154, and 156-162 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The NEW MATTER rejections summarized in the previous office action, mailed 1/12/04, are reiterated and maintained from said office action as follows.

The computer program and related claims as now pending still lack the limitation of the program etc. limitations directed to a photon counting program which is summarized in parent Patent No. 5,143,854 in column 22, lines 18-42 and was included as an issue in the previous action NEW MATTER rejection.

The NEW MATTER in claims 102-107 regarding the limitation of "less than 1/2" collection of intensity data has not been responded to and is still deemed NEW MATTER.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 57-120, 122-125, 129-132, 134-136, 141-144, 149-152, 154, and 156-162 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Williams et al. [DNA 4(3): 255 (1985)].

This rejection is maintained and reiterated from the previous office action, mailed 1/12/04. The claims have been amended to indicate that diverse polymers are each localized on a small area with a size indicated. In response to this amending which is also argued regarding this reference, the "each diverse polymer" limitation in claim 57, for example, is reasonably interpreted as being directed to defining each such molecule which is a polymer. Such each polymer is vastly smaller in size than that which would be required to take up 2.5×10^5 square microns and nucleic acids of Williams et al. also are much smaller even if spread out over such an area. Thus, the reference still anticipates the instant claims as previously set forth.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1631

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
